

### Capability Narrative

Reality IMT offers precise digital twin and geospatial mapping services for efficient facility management and infrastructure documentation. Our turn-key solutions include 3D laser scanning, as-built measurements, and BIM/GIS integration, serving architects, engineers, facility managers, and building owners.

### Nation Wide Services

- Building Measurements & CAD.
- 3D Laser Scanning of Facilities.
- Railway Right of Way Mapping.
- Building Information Modeling (BIM).
- Geographic Information System (GIS).
- Street Asset Inventory.
- Sidewalk Mapping and Assessment.

### Differentiators:

1. Turn Key data capture, processing & delivery.
2. Combined knowledge in Mapping (GIS) & Architecture (BIM).
3. Utilizes the latest 3D laser scanning and mobile LiDAR technology for rapid and accurate data

### Core Competencies:

1. High-accuracy 3D laser scanning for as-built documentation.
2. Rapid mobile LiDAR data acquisition for infrastructure Assessment. - Nationwide.
3. 15+ years of experience with Revit & ArcGIS.
4. Diverse expertise in Architectural, Structural, MEP, Railway and Street mapping.

### Past Performance:

Since Inception in 2015, we've documented and mapped:

- More than 30 million square feet of buildings.
- More than 2,000 miles of corridors.

### A few of our clients are:

AECOM

STP  
Nuclear Operating Company

ConocoPhillips
